SUCCESS STORY

The Story

Iberville Parish Schools are a community network of public school, Head Start and childcare classrooms. These programs operate together to provide the full continuum of learning for their youngest children. There is a seamless transition between the childcare and Head Start programs using Frog Street Infant and Toddler to the school system using Frog Street Threes and Pre-K.

The Iberville Parish School system was awarded the Frog Street Excellence in Education Award. They have demonstrated that they have excelled in using the Frog Street curriculum to meet the unique needs of the children they serve, helping to prepare them for kindergarten and beyond! The hard work and dedication of this team are an inspiration to all educators, and they are an excellent example of an unwavering commitment to providing high-quality education to our youngest learners.

The Challenge

When the pandemic began, the teachers at Iberville Parish Schools recorded Frog Street lessons and uploaded them to a YouTube channel for children to watch virtually from home. Once they were allowed to have in-person instruction, teachers led in-person and virtual instruction simultaneously in their classrooms. They also provided recorded lessons to accommodate those families who could not attend the scheduled virtual lessons. Teachers faced the challenge of juggling both in-person and virtual instruction while working to meet all students' needs.

The Solution

Frog Street developed a custom training program for the Iberville Parish Schools to help teachers provide high-quality virtual lessons. The teachers also utilized online resources provided by Frog Street during the pandemic.

For this teaching strategy to be effective, the administration at Iberville Parish Schools continued to provide their teachers with professional development through online coaching during the pandemic. Frog Street coaches were very accommodating during this time.
